

SURYAKIRAN U

Full Stack Developer · React · Angular · NestJS · Django

devpytech@gmail.com | +91 99463 85646 | [linkedin.com/in/devpytech](https://www.linkedin.com/in/devpytech) | suryakiranportfolio.vercel.app

SUMMARY

Full Stack Developer specializing in React and Django, with hands-on experience building production-ready applications including billing systems and role-based platforms. Strong in authentication systems, REST APIs, and scalable UI design. Focused on building clean, scalable, and user-centric applications.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern

3-Month Internship

Techfio Innovations · Palakkad

- Developed a web-based Billing Management System, reducing manual invoice processing time by ~40%.
- Integrated REST APIs for real-time data synchronization and dynamic UI updates.
- Implemented advanced invoice logic including tax calculation and multi-bank transaction handling.
- Improved UI reliability with strong validation, responsive design, and production-level error handling.

Junior Web Developer Intern

Jul 2025 – Aug 2025

Telematics Technologies Pvt. Ltd. · Coimbatore

- Developed a full-stack Student Record Manager using Angular and NestJS with complete CRUD functionality.
- Designed and integrated RESTful APIs with PostgreSQL for efficient and scalable data management.
- Implemented secure authentication with login, registration, and backend validation.
- Enhanced UI performance and usability, improving page responsiveness and user experience.

PROJECTS

Palakkad Tourism Trip Planner — Full Stack Project — React, Django, PostgreSQL, Firebase

- Developed a full-stack tourism web application enabling users to generate personalized travel itineraries based on interests and trip duration.
- Built a clean and responsive UI with dynamic destination filtering, category-based exploration, and interactive itinerary planning.
- Implemented REST APIs using Django REST Framework for managing places, galleries (image & video), and trip data.
- Designed an admin panel for managing destinations, gallery content, and user-generated data with full CRUD functionality.
- Integrated real-time features and modular API handling using Axios with scalable frontend architecture.

Gym Management System — Sole Frontend Developer — React + Vite, Tailwind CSS, Django REST Framework, Firebase

- Developed a dual-panel Gym Management System (Maintainer + Superadmin) managing members, renewals, transactions, and support operations.
- Implemented secure JWT authentication with role-based access control and module-level permissions.
- Integrated Firebase FCM for real-time push notifications with backend token synchronization.
- Built a modular Axios API layer with automatic token refresh and centralized error handling.

TechFifo Billing System — Sole Frontend Developer — React + Vite, Django REST Framework, html2pdf.js

- Developed a full-stack Billing Platform supporting Tax Invoices, Proforma Invoices, GST calculation, and client management.
- Designed a pixel-perfect A4 invoice system with multi-page support, PDF export, and print optimization.

- Implemented secure routing with JWT authentication and role-based navigation.
- Created a centralized Axios API layer for efficient authentication and data handling.

Student Record Manager — Internship Project — *Angular, NestJS, PostgreSQL, TypeScript*

- Developed a robust Student Record Manager with full CRUD operations using Angular (frontend) and NestJS (backend) with a clean REST API architecture.
- Implemented secure login and registration modules with backend validation and PostgreSQL for persistent data storage.
- Used TypeScript throughout for type safety across both frontend and backend.
- Optimized UI performance and overall application usability.

KEY HIGHLIGHTS

- Built 4+ full-stack applications with authentication and RBAC
- Hands-on experience with REST APIs and real-time systems
- Strong focus on responsive UI and production-ready applications

SKILLS

Languages:	Python, JavaScript, TypeScript, C, C++
Frontend:	React, Angular, Tailwind CSS, HTML5, CSS3
Backend:	Django, Django REST Framework, NestJS
Databases:	PostgreSQL, SQLite
Tools & Concepts:	JWT Authentication, RBAC, REST API Integration, Firebase FCM, Axios, Responsive Design, Debugging

LANGUAGES

English	Professional Proficiency
Malayalam	Native
Tamil	Conversational
Hindi	Conversational

EDUCATION

B.E. – Computer Science and Engineering EASA College of Engineering and Technology, Coimbatore · CGPA: 8.0	2022 – 2026
Higher Secondary – Computer Science State Board VMHS School	2020 – 2022

CERTIFICATIONS

- Python Programming Workshop – IIT Madras (Mechanica 2023)
- Internet of Things (IoT) Workshop – IIT Madras (Mechanica 2023)
- Python Code Challenges for Object-Oriented Programming – LinkedIn Learning (May 2025)
- AI for Kidney Health – Diagnosis & Treatment Prevention – EASA College (Mar 2025)
- Demystifying Cybersecurity – EASA College Webinar (Dec 2023)
